# The Three-Legged Stool

## Invest in the World's Most Advanced Technology

We believe the best patient care—and often the best patient experience—includes utilization of the best technology. You can see this in our commitment to research, our educational programs, and our bold, ongoing investment in advanced technology.

- Lorraine Provencher, MD,  
Omaha, NE

## Patient Experience

Excellent explanation of procedures. Very informative in discussing each step of testing and the results. Kind and caring! Have recommended your facility and Dr. Morton and Kelly Sieps to friends and family.

- Donna F, South Sioux City  
Patient – Google Review

## Do the Right Thing

Doing the right thing often isn't about grand gestures. Rather, doing the right thing is often simpler. It's the everyday acts of kindness: pushing snow off a co-worker's windshield, offering a warm beverage to a delivery driver on a frigid day, helping a patient who wasn't properly dressed for the cold – or admitting when you make a mistake, even if it creates a few extra steps to correct it.

- Susan DeGroot,  
Bozeman, MT

### Vance Thompson Vision Expands to Northern Colorado

Loveland, CO

We are excited to announce our expansion of Vance Thompson Vision to Northern Colorado! Our new location will be led by Dr. Cullen Ryburn, former Vance Thompson Vision Billings, MT, ophthalmologist and outstanding anterior segment surgeon renowned for his skills and meaningful connections with patients.

We want to thank Dr. Ryburn for all his work in Billings and we wish him and his wife, Katelyn, the best on their homecoming. They are originally from the Fort Collins area, and it's where Dr. Ryburn practiced before moving to Billings. They are so excited to work with the local eye care community and serve the patients of Northern Colorado.

Our Northern Colorado location will continue our commitment to providing world-class vision care as this location specializes in advanced surgical treatments including refractive, cataract, and glaucoma surgery, and cornea care. We look forward to working closely with local optometrists and serving the Northern Colorado community with the same commitment to excellence that has defined our practice for over 30 years.

### Streamlining Patient Education Through Virtual Reality

Michael Greenwood, MD

Discussing cataract surgery and IOL options with patients can be a time-consuming effort. InSightVR by GreenMan is revolutionizing patient education by streamlining this process for both patients and doctors. Using a VR headset, this technology immerses the patient in an advanced virtual reality system. They can experience how different IOL options affect their vision in various settings, from reading, driving at night, or

viewing distant objects. This hands-on approach will help patients better understand the functional benefits and trade-offs of each lens option, reducing confusion and increasing confidence in their decision making.

## Doctor Spotlight

### Daniel Terveen, MD

Sioux Falls, SD

Dr. Daniel Terveen is a board-certified ophthalmologist who is committed to providing the best possible outcomes for his patients. His dedication to innovation has earned him several prestigious awards in research and patient care.

Since childhood, Dr. Terveen has always been drawn to solving complex problems. This interest turned into a passion, and it led him to develop skills in caring for patients with the most challenging cornea, glaucoma, and cataract troubles. He is excited about the advancements in gene therapy and stem cell transplants, and he is a dedicated advocate for improvements in care for all patients.

In his spare time, Dr. Terveen loves spending it with his wife, Marnie, who is also a doctor, and their four energetic children. He also likes to cook, read, play tennis, and spend time with close family and friends.

### Kristin Mohr, OD

Sioux Falls, SD

Dr. Kristin Mohr is an optometrist with a deep commitment to helping others improve their vision. After seeing her hometown optometrist, she immediately fell in love with the ability to maximize the gift of sight and help people in her community. She volunteered with the Student Volunteer Optometric Services to Humanity, providing vision care to underserved communities.

Dr. Mohr graduated from South Dakota State University and obtained her doctorate of optometry from the Michigan College of Optometry of Ferris State University. After completing her residency at Vance Thompson Vision in Sioux Falls, SD, she decided to stay and further her commitment to research and the latest advancements in the ophthalmic field.

Dr. Mohr loves problem solving and helping people. Her favorite part of the process is the collaboration between optometrists and ophthalmologists working to restore a patient's vision or helping someone meet their visual goals. In her free time, Dr. Mohr loves spending time with her husband, Brandon. She also enjoys a number of activities, like weightlifting, yoga, HIIT, walking, or playing sand volleyball in the summer.
