Tell Your Friends & Family About RLE

Written By Vance Thompson

You already know how life-changing clear vision can be. But have you noticed friends or family members struggling to read menus, text messages, or price tags? If they’re constantly reaching for reading glasses or frustrated with bifocals, they may not realize there’s a better solution. Refractive Lens Exchange (RLE) is a long-term fix that replaces the eye’s aging lens with an advanced artificial lens, restoring vision at all distances—often eliminating the need for glasses permanently.

Many people assume they just have to “deal with” vision changes as they age, but that’s not the case. RLE is similar to cataract surgery but is performed earlier, before cataracts

develop, allowing people to enjoy crisp, clear vision for years to come. If you’ve experienced the benefits of advanced eye care, why not share this life-changing information with the people you care about?

Here are a few simple ways to start the conversation:

“I used to struggle with my near vision too, but did you know there’s a procedure that can help?”

“You don’t have to wait for cataracts—there’s a way to restore your vision now!”

If someone you love is frustrated with their vision, encourage them to explore their options. Their eyes deserve the best!

Our Doctors

Your vision is too important to leave to chance. Our board-certified, Fellowship-trained doctors are here to provide clear answers about your vision and provide world-class care.

Paying for LASIK

LASIK is an investment that pays off in many ways. At Vance Thompson Vision, we walk you through opportunities for laser vision correction to be the best investment you make. One payment option is to take advantage of your tax-free flexible savings account (FSA) or health savings account (HSA). Both funds are built on pre-tax dollars, saving you money right away. Now is the time to start planning to take advantage of tax benefits. With additional no-interest financing options, provided through CareCredit, you might find that LASIK is more affordable than you think. Schedule your complimentary LASIK screening. We will meet with you to talk about your vision AND your budget.

What will vision be like after surgery?

DISTANCE

INTERMEDIATE

NEAR

Monofocal

Glasses should be expected for reading, computer, and even distance for best vision.

TORIC

Improves distance vision. Glasses needed for intermediate and near vision.

Light Adjustable Lens

Great range of vision, glasses may be needed for some near activities.

Extended Depth of Focus (EDOF)

Great range of vision, glasses may be needed for some near activities.

Trifocal

Offers most range of vision and most spectacle independence.
